

## Easy Acoustic Treatment Meets Easy Design

ABSORB 2D absorption panels provide streamlined design for our most popular application. When applied on interior walls and ceilings, ABSORB products reduce auditory stress by increasing sound coherence and intelligibility.

**Application:** Schools, offices, libraries, public spaces, restaurants, coffee shops, breweries, performance spaces, auditoria, recital halls, lecture halls, band practice facilities, orchestra pits, recording studios, recording control rooms, broadcast studios, production and post-production facilities, critical listening rooms, home theaters, and conference rooms.

**Characteristics:** ABSORB is a wide bandwidth acoustic absorption product for increased acoustical clarity. Various shapes and sizes provide interior designers and architects with a wide array of design options for an artistic and visually pleasing space.

**Mounting:** Mount with Roto-fast clips, Z-clips, impaling clips or appropriate construction adhesive.

**Finishes:** Available in 6 unique shapes in various sizes and wrapped with premium acoustical fabrics from Guilford of Maine in a wide array of colors.

**Panel Size Options:** ABSORB Panels are available in various sizes depending on the shape. Shapes only available in 1" thickness. Quadrilateral panels are available in any size or thickness up to 4".

**Fire and Environmental:** Fiberglass products are Class A fire rated. LEED v4 credit and pilot credit qualified.

**Acoustical Data:** Extensive acoustical test data is available through our website including absorption tests in agreement with ASTM C-423.
